

E-Commerce

E-commerce is a valuable business tool enabling your business to be trading 24 hours a day 7 days a week. Why should your business sleep when you do?

E-commerce is growing rapidly. By using the internet as a sole or additional channel to market products businesses can:

- Reach over 500 million people use the Internet.
- Reduce costs as creating a business on the Web is inexpensive.
- Generate profits more quickly by reaching a larger audience at low costs

Our online stores (e-shops) incorporate continually updated software for maximum security. We use the industry-standard SSL to provide an uninterrupted shopping experience.

CMS

D-ICE CMS is a totally integrated content management system empowering web site owners, marketing departments and business owners to take full control of their web sites without any external out-sourcing or technical knowledge. And because you have control over your site, you can change it as often as you wish.

Unlike other content management systems, our CMS back office software is available in a Lite or Full Version, depending on the clients needs. This enables the client to avoid investing in an overkill and over budget system until the time may come to upgrade.
